

PG&E FleetReady Program

Together, Building
a Better California

Primary programs

- EV Charge Network: Level 2 charging at workplaces and multi unit dwellings
- FleetReady: part of SB350 filing, charging for medium and heavy-duty fleet vehicles
- Fast Charge: part of SB350 filing, fast charging for urban centers and transit corridors

Other activity

- Clean Fuel Rebate: rebates for EV drivers
- Priority review projects: various pilots to explore specific use cases of vehicle electrification

FleetReady program overview (SB350)

**“Make-ready”
infrastructure for
medium and heavy-
duty fleets**

**\$236 million over 5
years (2019-2023)**

**Target of 700 sites and
6,500 EVs supported**

**Additional incentives
for school and transit
buses**

FleetReady deployment status

High level milestones

- June 2018: funding approved
- June - December 2018: establish program operations, complete regulatory requirements, begin work with early “beta” customers
- Q1 2019: full scale implementation

Approach

- Work closely with auto OEMs and dealers to coordinate vehicle purchase & infrastructure installation
- Focus on a few key segments first (including transit)
- Coordinate with SCE for common California experience

High level customer journey

1

Info & application

Site hosts apply online at pge.com/fleetready

2

Initial approval

PG&E performs internal review to ensure site is eligible and meets basic standards (e.g. technical feasibility)

3

Preliminary design

PG&E creates preliminary design; host chooses equipment

4

Final design

PG&E and program participant approve final design. Program participant signs easement allowing access to the PG&E-owned infrastructure

5

Construction

PG&E manages site construction with host

6

Activation

Chargers are energized and rebates are processed after inspection

How can we help each other?

How you can help *us*

- Submit your interest: www.pge.com/fleetready
- Feedback! We want to know all about your pain points, electrification plans, and how the utility can support you

How we can help *you*

- Coordinate with other IOUs
- Coordinate with other funding sources
- Provide education and guidance through infrastructure installation of individual projects
